Expressions of Appreciation

“This course has changed my thinking for every LVA patient” - **Md Danish Siddiquei**

“The process & method of teaching is continue to be very unique & understandable.” - **Sayantika Kumar**

“Valuable experience on LVA, telemedicine, assistive technology for visual impairments patient and rehabilitation centre for visually impaired patients.”

-**Hezil Thelma**

“I was not sure about online classes before joining but I was really impressed with the entire process and the course. Teaching is also amazing. I could get my doubts cleared easily, as there were one on one LIVE sessions with all faculty after completing every lecture.” - **Aishwarya Pardeshi**

“I really appreciate the initiative taken by the faculties who have helped me to understand the subject very thoroughly. Looking forward to set up a Low Vision Clinic in near future!!!.” - **Samrat Panda**

“My future plan is to set up a low vision clinic in India and provide subsequent rehabilitation referral guidance side by side. I am looking forward to join other courses.” - **Avik Sen**

“I very much enjoyed this course. Thank you for this very informative course.” - **Surekha Sutar**

“The level of understanding was so subtle that even a student could have grasped the context. The most different thing was that the industry was introduced which we lacked in our college years.

Thanking team LBV for a fruitful course.” - **Sakina Mussaji**

“The course has enhanced and updated my knowledge.” - **Devi D R**

“I have the confidence now to start my low vision practice and the team LBV has been mentoring me even now.” - **Vinodhini Munikrishnayya**

“I have done many courses before but by doing this I will be able to augment one my practice and business.” - **Manmeet Singh**

“I feel confident to talk about low vision now and will promote this course.” - **Vikash Chaturvedi**

“I am so glad I joined this course as I am waiting to start my low vision clinic.” - **Menka Sharma**

“I would strongly request all retina specialists to enrol their optometrists into this course.” - **Dr Anup Shah**
